# NEW TO PRESETS?

Welcome to our iOS guide for your new Luxe Lens presets! This is a quick process, but broken down into bite-sized steps!

Prefer a video guide? We've got one [HERE!](#)

To begin, be sure that:

- Your iPhone is up-to-date
- You have plenty of storage space
- Lightroom Mobile is up-to-date in the app store!
- You have a strong Wi-Fi connection
- You can locate your Luxe Download Email (including the link as pictured here):

# INSTALLATION

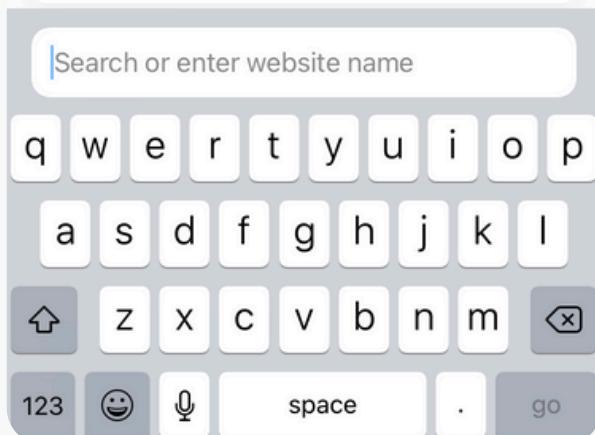

# 1

## COPY YOUR LINK

You will receive a "Download Your Presets" link via email. Press & hold your download link, then click "Copy Link" to copy the link.

In the last seven days, Safari has prevented 0 trackers from profiling you and hidden your IP address from known trackers.

# 3

## SELECT XMP LINK

Scroll to view your format options & select the option which reads: "XMP ZIP | Desktop: Subscription Lightroom, Lightroom Classic, and Photoshop (ACR) | Mobile: Lightroom Mobile APP"

# 2

## PASTE YOUR LINK

Launch the Safari App\*. Paste your copied link into the URL Bar in Safari.

This will take you to your secure downloads page!

LRTEMPLATE ZIP | Works with LR Classic 5-7.2 (pre-2015) and LR CC 2015 only

DNG ZIP | Lightroom Mobile App on Apple iPhone + iPad

\* To ensure proper download, we recommend only using Safari.

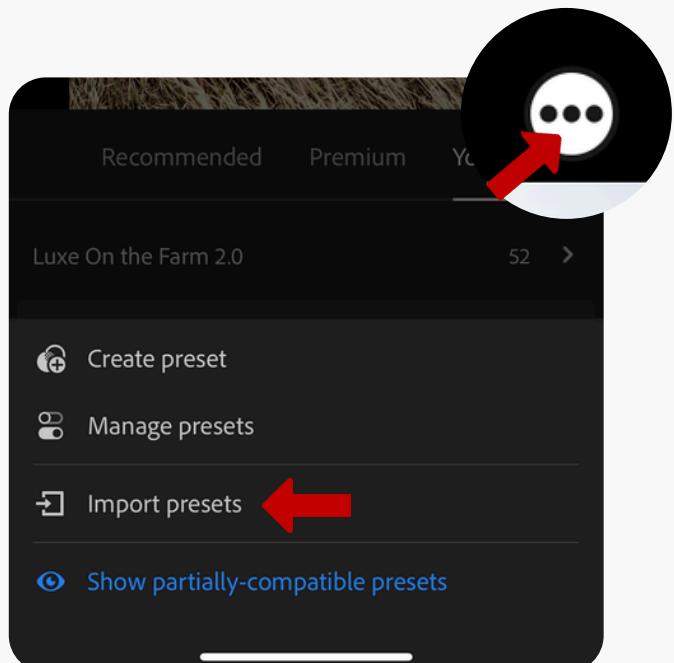

# 4 DOWNLOAD

On that page, click to Download your XMP files. You will see “Do You Want to Download?” pop-up. Click “Download” in blue to start your download.

# 5 OPEN LIGHTROOM

No need to open or unzip your downloaded files. Simply Launch Lightroom and click on any of your images to open it into “Edit Mode”. Then Click “Presets”

# 6 “IMPORT PRESETS”

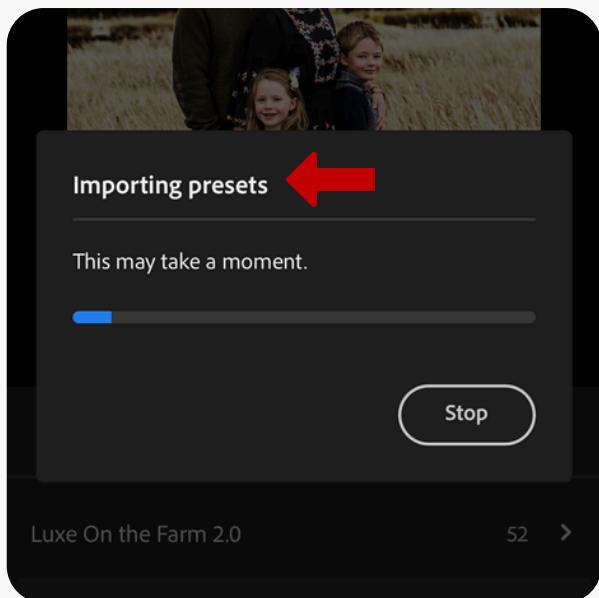

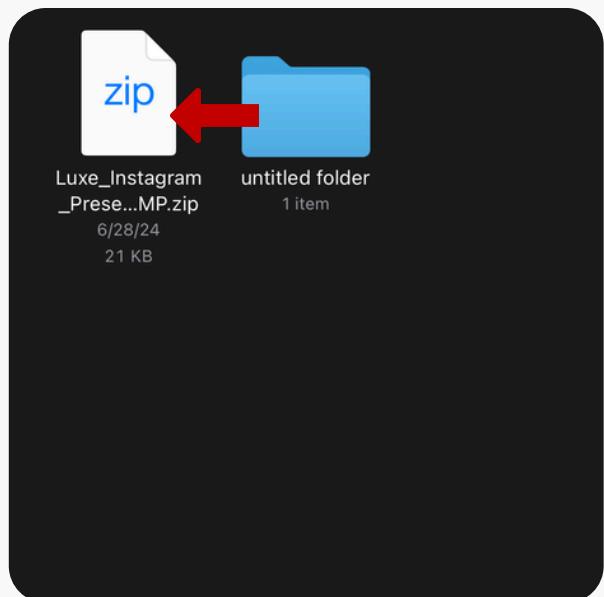

In the Presets tab, click on the “...” icon on the top right to open the Presets options menu. Select the “Import Presets” option from this menu.

Can't find “Import Presets”? Head to [Troubleshooting](#).

## 7 SELECT YOUR PRESETS

Select the XMP .zip you downloaded to import your presets. Repeat for each collection you purchased & downloaded.

Note: If using the FREE app, skip the AI toolkits.

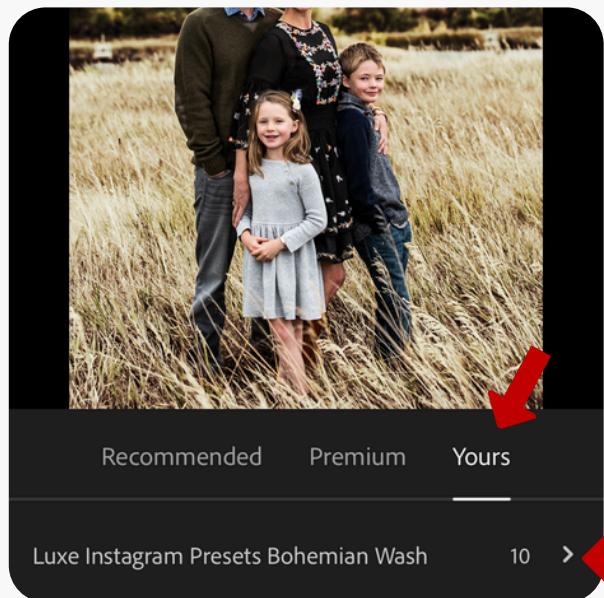

## 8 SUCCESS!

You should see a pop-up progress bar as your new presets populate. It will then show a blue success message once all presets are installed.

## 9 FIND YOUR NEW PRESETS

Locate your newly imported presets under the "Yours" tab, labeled with the collection name. Click to open and view presets.

## A **T**PPPLY PRESET(S)

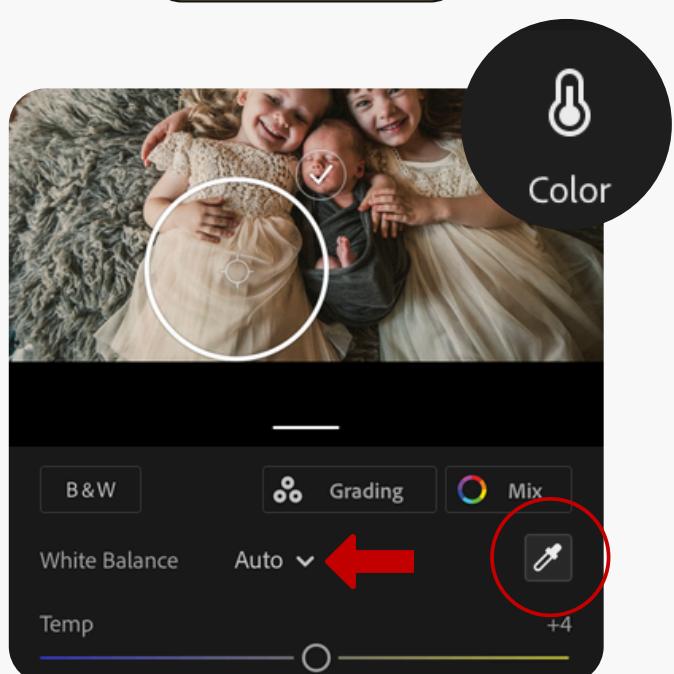

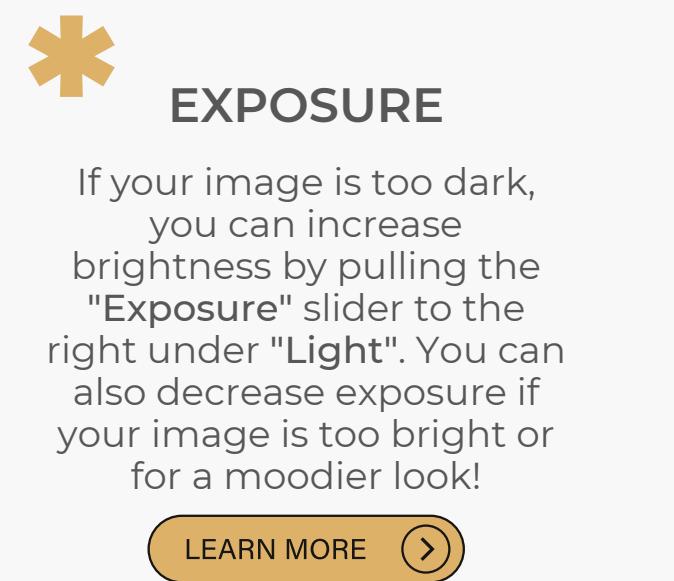

Under your new preset group, you will see all of the presets you saved! Click each one to preview. Click the checkmark on the bottom right to apply! Tool presets will need to be stacked one-at-a-time and checked each time.

## A **\***WHITE BALANCE

If your image appears too yellow or blue, you may want to correct your White Balance under "Color". For quick results, set it to "auto" via the dropdown or place the dropper tool over a neutral color in your image.

## "OPEN IN..."

If you make a download attempt in Chrome and get an "Open In..." pop-up, click "Open In..."

## AI PRESETS

AI Presets and Special Effects presets will not preview or function outside of the Premium Lightroom app. This is because they rely on Premium-locked features to function. They will also not function on older devices. See more on our [compatibility page](#).

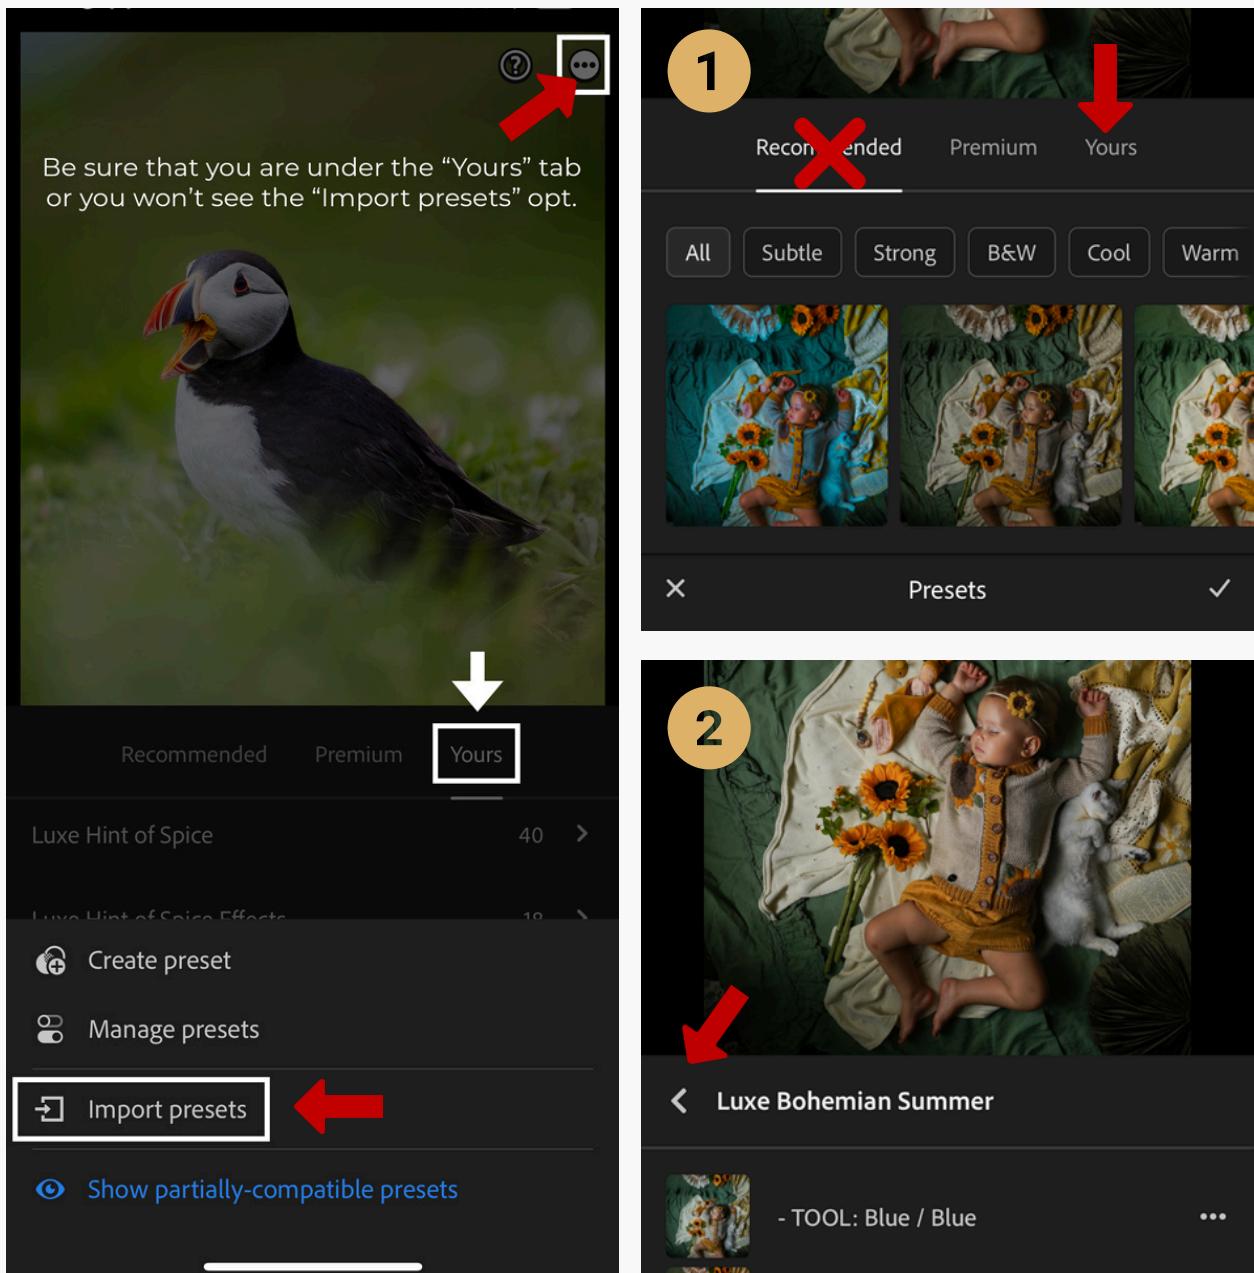

## HOW TO FIND IMPORT PRESETS

On iOS “Import Presets” is only visible in a very specific location. You must be clicked into Presets, and viewing the “Yours” tab before you click the “...” menu.

Don’t see it? You may be in the wrong place! (1) If you are under the Recommended or Premium tabs, click over to “Yours”. (2) If you are clicked into a preset group, you will see a little back arrow, click this.

Need to see this for iPad? turn to the next page!

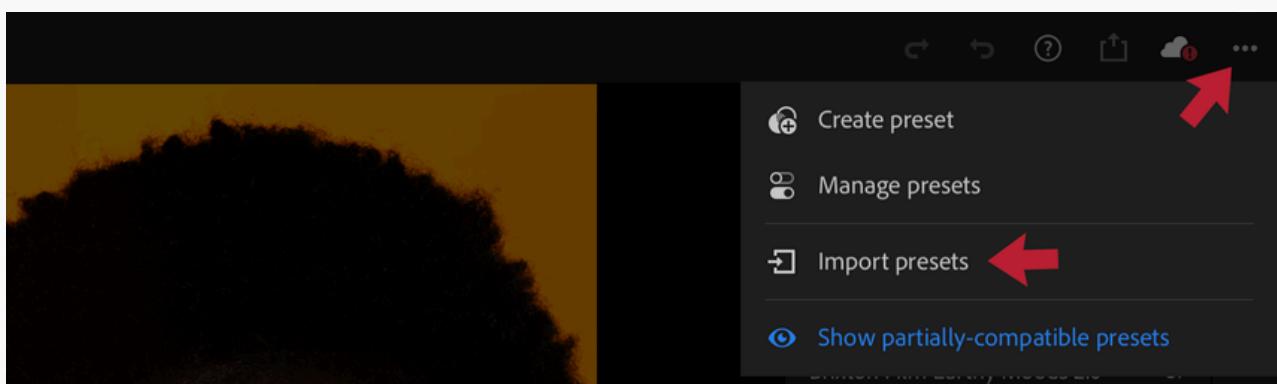

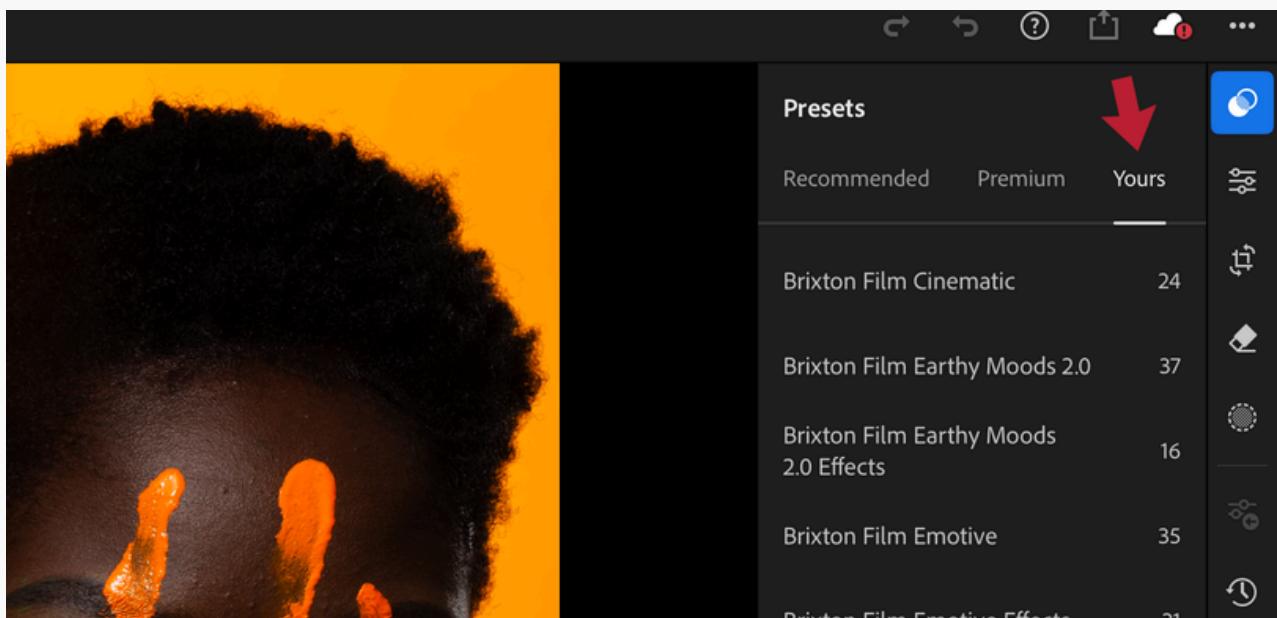

## LOCATING “IMPORT PRESETS” ON IPAD

Can't find “Import Presets” or don't see it as an option on iPad?

On iPadOS “Import Presets” is only visible in a very specific location.  
You must be clicked into **Presets**, and viewing the “**Yours**” tab  
before you click the “...” menu.

Don't see it? You may be in the wrong place! If you are under the Recommended or Premium tabs, click over to “**Yours**”. If you are clicked into a preset group, you will see a little back arrow, click this.

Once your screen looks like the top image below, you should be able to find “**Import Presets**” under the “...” menu
